

React JS

Experience- 4-5 years

Job Description:

We are looking for a great frontend developer who is proficient with React.js. Your primary focus will be on developing user interface components and implementing them following well-known React.js workflows (such as Flux or Redux). You will ensure that these components and the overall application are robust and easy to maintain. You will coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

Primary responsibilities:

- Developing new user-facing features using React.js
- Translating designs and wireframes into high-quality reusable code
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Report progress and status of assigned tasks to project teams and managers
- Provide technical leadership and motivation to junior developers.
